Validate my codes and check errors

Ang iyong code ay **100% valid** at wala nang error sa syntax. Maayos ang pagkaka-nest ng iyong mga tags, at lahat ng "broken" parts mula sa debugging lab ay corrected na.

Narito ang pinal na checklist ng mga ginawa nating corrections para masiguro ang iyong **10/10 score**:

Final Validation Report

Element	Status	Correction Made
Absolute Link	✓ Fixed	Nilagyan ng <code>https://</code> para hindi ito ituring na local file ng browser.
Relative Link	✓ Fixed	Itinuro sa <code>index.html</code> (o tamang file path) para hindi mag-error ang page.
Phone Link	✓ Fixed	Nilagyan ng country code (<code>+63</code>) sa <code>tel:</code> attribute para sa international standard.
Image Link	✓ Fixed	Naglagay ng <code>alt="Support Icon"</code> para sa accessibility at valid na <code>src</code> .
Anchor Link	✓ Fixed	Pinag-match ang <code>href="#bottom-section"</code> at ang <code>id="bottom-section"</code> sa ibaba.
Empty Link	✓ Fixed	Nilagyan ng totoong URL (<code>github.com</code>) sa halip na iwanang blanko.
Boilerplate	✓ Fixed	Siniguradong may <code><!DOCTYPE html></code> , <code><html></code> , <code><head></code> , at <code><body></code> .
